

NAME

hd – dump files in hexadecimal format

SYNOPSIS

hd [-s] [-b] [-p] [-j *offset*] [-n *bytes*] [-N *bytes*] [-h] [-v] [*file...*]

DESCRIPTION

Write an unambiguous representation, hexadecimal bytes by default, of FILE to standard output. With more than one FILE argument, concatenate them in the listed order to form the input.

With no FILE, or when FILE is -, read standard input.

OPTIONS

- s Prints one-line string
- b Prints the binary of one-line string hex dump. ('hd -s /bin/sh | hd -b > copy-of-sh')
- p Prints without spaces and characters but in lines.
- j *offset*
Move to file offset first
- n BYTES
limit dump to BYTES input bytes
- N BYTES
same as -n, 'od' cmpt
- h Help screen
- v Program information (version, license, ...)
