

NAME

path++ – cleanup path

SYNOPSIS

path++ [**-scb**] [**-h**] [**-v**] [*directory...*]

DESCRIPTION

Check directories of path removes non-exists, duplicated, and add directories to system's PATH. With few words, cleansups the PATH. When it runs, it prints out the corrected path.

Example (tcsh):

```
setenv PATH `path++`
```

Example (bash):

```
export PATH=$(path++)
```

OPTIONS

- s** Add new directories at the beginning; otherwise appends
- c** Print csh command
- b** Print sh command
- h** Help screen
- v** Program information (version, license, ...)
