NAME

path++ - cleanup path

SYNOPSIS

```
path++ [-scb] [-h] [-v] [directory...]
```

DESCRIPTION

Check directories of path removes non-exists, duplicated, and add directories to system's PATH. With few words, cleanups the PATH. When it runs, it prints out the corrected path.

OPTIONS

- -s Add new directories at the beginning; otherwise appends
- -c Print csh command
- **−b** Print sh command
- -h Help screen
- -v Program information (version, license, ...)
